

Plus Series Auto Defrost Freezers feature a microprocessor temperature controller allowing for the precise temperature management necessary for critical samples and supplies. The temperature display and alarm module offers product security with a monitoring and alarm system. Remote alarm dry contacts and an access port are provided to simplify connections to existing facility monitoring systems.

†DISCLAIMER: Auto defrost freezers incorporate an electric heater installed on the evaporator that assists in the removal of the frost and ice. Although the heater helps speed up the frost and ice removal, it can raise the temperatures within the freezer. These air temperature spikes can be harmful to some medical and laboratory products. Auto defrost units have programmed defrost cycles that will reach air temperatures of approximately 0°C.

FEATURING

- Microprocessor temperature controller
- Adjustable temperature range:
Freezer (-20°C): -15°C to -25°C
Freezer (-30°C): -27°C to -33°C
- Auto Defrost
- Remote alarm contacts
- Keyed door lock
- Magnetic door gasket for positive seal
- Swivel casters (5 ¾")
- Probe access port
- ETL Listed
- Two year parts and labor warranty, plus an additional three year compressor parts warranty

- Digital temperature display
- Audible and visual temperature alarms
- Resettable Min/Max
- °C/°F switchable

Environmentally friendly, natural hydrocarbon (HC) refrigerants that vastly reduce global-warming potential while meeting new EPA/SNAP mandates.
